

## **APPENDIX B**

**Marked-up version of the claims indicating amendments where deletions are shown by brackets and additions are shown by underlining:**

1. (Twice Amended) A tubular reflector comprising:

a reflector portion extending from a first surface end to a second surface end, the reflector portion [formed around] positioned on either side of a tubular light source, the reflector portion reflecting light emanating from the tubular light source towards an aperture of the tubular reflector, and

a semi-circular reflector having a smooth reflective surface, the semi-circular reflector coupled to the first surface end of the reflector portion so that light emanating from the tubular light source is reflected off of the semi-circular reflector [downwardly] and re-directed from the light source [and] towards the aperture of the tubular reflector.

7. (Twice Amended) A tubular reflector comprising:

a semi-circular reflector [formed around] having a tubular light source mounted in the semi-circular reflector, the semi-circular reflector reflecting light emanating from the tubular light source; and

a multi-faceted reflector coupled to the semi-circular reflector, the multi-faceted reflector having at least two facets positioned at angles to one another so that light emanating from the tubular light source is reflected [downwardly] away from the light source.

14. (Twice Amended) A tubular lighting device comprising:
- a housing portion having an interior reflecting surface;
  - a first reflective finish disposed on the interior reflecting surface;
  - a reflector portion coupled to the interior reflecting surface;
  - a tubular light source mounted in the semi-circular reflector portion, the semicircular reflector portion formed around the tubular light source;
  - a second reflective finish disposed on the semi-circular reflector portions; and
  - a lens portion coupled to the housing portion; [and]
- such that the reflective finish reflects light from said tubular light source towards the lens portion.
